BATTERY

The PBX-1206 is a lithium battery powered PA loudspeaker. Be sure that you have completely charged the battery prior to first use to maximize the battery's lifespan. Once the power adaptor is connected to a power source, it will automatically begin charging (2~4 hours to fully charge the lithium battery) Even if the battery power is low, it will power on when connected to a power source. When the battery power is low, the battery indicator light is red. When the battery is charged fully, the light indicator will turn off. Upon completion of the charging, please disconnect the unit. With standard usage, a fully charged battery can play for about 1 hours. Battery can be recharged about 300 times in its lifetime. When not in use, the speaker should always be set to "OFF" to prevent the unit from draining the battery. When the unit is not used for prolonged periods of time, the battery will gradually lose its power. It is recommended to fully charge the battery at least every 60 days.

BATERÍA

El PBX-1206 es un altavoz de megafonía alimentado por batería de litio. Asegúrese de haber cargado completamente la batería antes del primer uso para maximizar la vida útil de la batería. Una vez que el adaptador de corriente está conectado a una fuente de alimentación, comenzará a cargarse automáticamente (2~4 horas para cargar completamente la batería de litio) Incluso si la carga de la batería es baja, se encenderá cuando se conecte a una fuente de alimentación. Cuando la carga de la batería es baja, la luz indicadora de batería es roja. Cuando la batería esté completamente cargada, el indicador luminoso se apagará. Una vez completada la carga, desconecte la unidad. Con el uso estándar, una batería completamente cargada puede funcionar durante aproximadamente 1 horas. La batería se puede recargar unas 300 veces durante su vida útil. Cuando no esté en uso, el altavoz siempre debe estar en "APAGADO" para evitar que la unidad agote la batería. Cuando la unidad no se usa durante períodos prolongados de tiempo, la batería perderá gradualmente su energía. Se recomienda cargar completamente la batería al menos cada 60 días.

BATTERIE

Le PBX-1206 est un haut-parleur PA alimenté par batterie au lithium. Assurez-vous que vous avez complètement chargé la batterie avant la première utilisation afin de maximiser la durée de vie de la batterie. Une fois que l'adaptateur secteur est connecté à une source d'alimentation, il commence automatiquement à se charger (2~4 heures pour charger complètement la batterie au lithium) Même si la batterie est faible, il s'allume lorsqu'il est connecté à une source d'alimentation. Lorsque la charge de la batterie est faible, le voyant de la batterie est rouge. Lorsque la batterie est complètement chargée, le voyant lumineux s'éteint. Une fois le chargement terminé, veuillez déconnecter l'appareil. Avec une utilisation standard, une batterie complètement chargée peut jouer pendant environ 1 heures. La batterie peut être rechargée environ 300 fois au cours de sa vie. Lorsqu'elle n'est pas utilisée, l'enceinte doit toujours être réglée sur «OFF» pour éviter que l'appareil ne décharge la batterie. Lorsque l'appareil n'est pas utilisé pendant des périodes prolongées, la batterie perd progressivement sa puissance. Il est recommandé de charger complètement la batterie au moins tous les 60 jours.
