Once the power adaptor is connected to a power source, it will automatically begin charging (8 hours to fully charge the battery) Even if the battery power is low, it will power on when connected to a power source. When the battery is charging, the battery indicator light is red. When the battery charge fully, the indicator light will turn off. Upon completion of the charging, please disconnect the unit. When not in use, the speaker should always be set OFF to prevent the unit from draining the battery. When the unit is not used for prolonged periods of time, the battery will gradually lose its power. It is recommended to fully charge the battery at least every 60 days. When battery is completely empty, the unit cannot perform at 100% of the volume when immediately connected to power source. It is suggested to charge for a while before using with 100% volume. The unit may work and charge with lower-level volume. The volume level would be increased as the unit is charging.

BATERÍA

El PBX-265 es un altavoz con batería recargable. Asegúrese de haber cargado completamente la batería antes del primer uso para maximizar su vida útil. Una vez que el adaptador de corriente esté conectado a una fuente de alimentación, comenzará a cargarse automáticamente (8 horas para cargar completamente la batería). Incluso si la carga de la batería es baja, se encenderá cuando se conecte a una fuente de alimentación. Cuando la batería se está cargando, la luz indicadora de la batería está roja. Cuando la batería se cargue por completo, la luz indicadora se apagará. Al finalizar la carga, desconecte la unidad. Cuando no esté en uso, el altavoz siempre debe estar APAGADO para evitar que la unidad agote la batería. Cuando la unidad no se utiliza durante períodos prolongados de tiempo, la batería perderá energía gradualmente. Se recomienda cargar completamente la batería al menos cada 60 días. Cuando la batería está completamente vacía, la unidad no puede funcionar al 100% del volumen cuando se conecta inmediatamente a la fuente de alimentación. Se sugiere cargar durante un tiempo antes de usarla con el 100% del volumen. La unidad puede funcionar y cargarse con un volumen de nivel más bajo. El nivel de volumen aumentará a medida que la unidad se esté cargando.

Lorsque la batterie est complètement déchargée, l'unité ne peut pas fonctionner à 100% du volume lorsqu'elle est connectée immédiatement à la source d'alimentation.
